SPECIFICATIONS

Loudspeaker Type: Two-way, full-range, ceiling loudspeaker system, 16 ohm or 70V/100V operation

Operating Range: 60 Hz to 20 kHz
90 Hz to 16 kHz (±5 dB)

Max Input Ratings (16 ohm): 60W continuous, 140W program
31 volts RMS, 67 volts momentary peak

Transformer Taps (70V/100V): Transformer taps at 60W, 30W, 15W, 7.5W with 70V/100V input

Recommended Power Amplifier: 110W to 170W @ 16 ohms

Sensitivity (1W/1m): 91 dB SPL (100 Hz to 16 kHz 1/3 octave bands)
90 dB SPL (250 Hz to 4 kHz speech range)

Maximum Output: 109 dB SPL / 115 dB SPL (peak 16 ohm)

Nominal Impedance: 16 ohms

Minimum Impedance: 5.9 ohms @ 5.1 kHz

Nominal –6dB Beamwidth: 120° conical

Axial Q / DI: 4.2 / 6.2, 500 Hz to 2 kHz

Crossover Frequency: 2 kHz

Recommended Signal Processing: 80 Hz high pass filter

Drivers: LF (1) 6” cast aluminum
HF (1) ¾” aluminum

Driver Protection: None

Input Connection: 4-position Phoenix connector

Controls: 16 ohm / 70V switch

Enclosure: Metal enclosure, white powder-coat paint

Mounting/Rigging Provisions: 4 seismic clips
4 aluminum mounting dogs

Grille: 18-gauge perforated steel with removable fire retardant foam insert

Required Accessories: Electronic high pass filter

Supplied Accessories: Loudspeaker grille, input plate, plug-in termination connector, T-bars (2), split ring support, paint protector

Optional Accessories: MRC6 mud ring (rough in plate)
C6IP input cover plate
CU-CUTTER speed saw / circle cutter

Dimensions—Bezel Diameter: 9.860 inches (250.5 mm)
Can Depth: 7.625 inches (193.7 mm)
Cutout Diameter: 8.75 inches (222.3 mm)
Weight: 8.2 lbs (3.7 kg) - per single loudspeaker
Shipping Weight: 25 lbs (11.3 kg) - per pair

NOTES:
1. Sensitivity: Free field pink noise measurement at 8 ft (2.4 m) at 25% power; extrapolated to 1 meter and an input of 4 volts RMS.
2. Watts: All wattage figures are calculated using the rated nominal impedance.

APPLICATIONS
• Convention centers, exhibit halls
• Corporate training rooms, ballrooms
• Swimming pools, cruise ships
• Athletic venues, sports facilities, health clubs
• Houses of worship, malls, airports

FEATURES
• All metallic enclosures (no plastic)
• Aluminum cones and diaphragms
• Selectable 70V / 16 ohm operation
• Transformer bypass
• Fast and easy installation
• Air Gap Technology (AGT)
• Smooth, uniform frequency response
• Five-year warranty

DESCRIPTION
Designed for optimum performance and consistent coverage with minimal diameter, the CLOUD6 uses a coaxial drive unit design and bass-reflex loading. A 6” cast aluminium frame mid/bass unit is coupled to a ¾-inch aluminium HF unit via a high-grade crossover. The CLOUD6 employs Air Gap Technology (AGT) cooling for increased long-term high output and reduced power compression. It has a nominal dispersion of 120 degrees conical and the integral 60W 70V/100V line transformer offers four taps and a bypass setting for low impedance (16 ohm) applications.

Unlike typical plastic ceiling loudspeaker designs, Community has opted for a robust all-metal construction, including the backcan, mounting clamps, bezel and grille. Wiring terminations are enclosed in a separate rear compartment with cover plate, provided with a phoenix termination and cable restraint. Flush mounting is simple and the entire installation can be performed from below the ceiling. Using the split-ring provided, the loudspeaker is simply pushed up into the mounting hole and secured with three machine screws located under the grille, which secure the die cast aluminium clamps. When flush mounting is not an option, each loudspeaker also has three hanging points for flying, in which event the white powdercoated backcan aesthetically matches the bezel and grille.

CLOUD6 ceiling loudspeakers are supplied in pairs, complete with two input plates, two input connectors, four T-bars, two split-ring supports and two paint protectors.
FREQUENCY RESPONSE

Resolution <500 Hz = 10 Hz, >500 Hz = 1/8 octave smoothing
