DESCRIPTION
The CSX25-S2™ is a rugged, high-sensitivity, two-way, full-range loudspeaker system. The system utilizes one PZT high-frequency driver coupled to an exponential horn and one 12” woofer for high sensitivity and excellent power handling capability. These components are matched to an optimally tuned direct radiating bass reflex enclosure. The recessed handles, black carpeted exterior and injection molded corners also make this system attractive, rugged and easily transportable.

The CSX25-S2 offers a robust internal PowerSense Dynamic Driver Protection crossover. The PowerSense crossover is built to last with high quality inductors and military grade circuit boards. The proprietary PowerSense DDP (Dynamic Driver Protection) circuit provides both over-current and thermal protection for added performance and reliability.

Designed as a stand-alone full-range loudspeaker system, the CSX25-S2 offers enough bass for most foreground/background and speech reinforcement applications. For more demanding applications, extended bass can be achieved by adding a CSX-S2 subwoofer.

Mounting is easily accomplished utilizing the threaded inserts provided and optional mounting kits.
