IMPORTANT SAFETY INSTRUCTIONS
Always follow these basic safety precautions when using or installing I SERIES loudspeakers and accessories:

- Read these instructions prior to assembly.
- Keep these instructions for reference.
- Heed all warnings.
- Follow all instructions, particularly those pertaining to rigging, mounting, hanging and electrical connections.
- Do not use this apparatus near water.
- Clean only with dry cloth.
- Do not block any ventilation openings. Install in accordance with the manufacturer’s instructions.
- Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
- Only use attachments and accessories that are specified and approved by the manufacturer.

Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.

The terms CAUTION, WARNING, and DANGER may be used in this manual to alert the reader to important safety considerations. If you have any questions or do not understand the meaning of these terms, do not proceed with installation. Contact your local dealer, distributor, or call Community directly for assistance. These terms are defined as:

CAUTION: describes an operating condition or user action that may expose the equipment or user to potential damage or danger.

WARNING: describes an operating condition or user action that will likely cause damage to the equipment or injury to the user or to others in the vicinity.

DANGER: describes an operating condition or user action that will immediately damage the equipment and/or be extremely dangerous or life threatening to the user or to others in the vicinity.

These installation instructions are for use by qualified personnel only. To reduce the risk of fire or electric shock do not perform any servicing other than that contained in the operating instructions unless you are qualified to do so.

RIGGING AND ELECTRICAL SAFETY

IMPORTANT: The loudspeakers described in this manual are designed and intended to be mounted to differing building surfaces using a variety of rigging hardware, means and methods. Installation of loudspeakers should only be performed by trained and qualified personnel. All electrical connections must conform to applicable city, county, state, and national (NEC) electrical codes.

DANGER: All rigging fittings must be fully tightened and secured. Any missing fasteners or parts will compromise the structural integrity of the enclosure and constitute a safety hazard. Do not suspend this loudspeaker unless all fasteners are securely in place!

DANGER: It is possible to experience severe electrical shock from a power amplifier. Always make sure that all power amplifiers are in the “OFF” position and unplugged from an AC Mains supply before performing electrical work.

IMPORTANT: Refer to the sections on installation and connections later in this manual for additional information on rigging and electrical safety.

IMPORTANT: The flat-head hex-drive rigging screws that come installed in each enclosure must either be replaced with rigging brackets and threaded fasteners, or they must be kept in place to seal the enclosure from air leaks. If the rigging fittings do not remain sealed, air leaks will occur in the enclosure that will compromise the low-frequency performance with distortion, reduced output, and premature driver failure.

UNPACKING / INSPECTION
Community I SERIES loudspeakers are engineered and manufactured to be rugged and they are carefully packed in sturdy cartons. However, it is recommended to thoroughly inspect each unit after it has been removed from the packaging, as damage could occur during shipping.

Please note that once the shipment has left your dealer or the Community factory, the responsibility for damage is always borne by the freight company. If damage has occurred during shipping, you must file a claim directly with the freight company. It’s very important to contact the freight company as soon as possible after receiving your shipment, as most freight companies have a short time limit within which they will investigate claims. Make sure to save the carton and the packing material, as most claims will be denied if these materials are not retained. Your Community dealer and the factory will try to help in any way they can, but it is the responsibility of the party receiving the shipment to file the damage claim.

It is always a good idea to retain the carton and packing materials, if possible, in the event that the unit may need to be returned to your dealer or distributor for repair in the future.

IN THE CARTON
Each shipping carton contains the following:

- Loudspeaker (fully assembled)
- Rubber feet and attachment screws (subwoofers only)
- Information packet

DANGER: I SERIES rigging fittings are rated at a Working Load Limit (WLL) of 225 lbs (102.1 kg) with a 10:1 safety margin. No single rigging fitting should ever be subjected to a load that is greater than this stated limit. Failure to heed this warning could result in injury or death!

CAUTION: Installation of I SERIES loudspeakers should only be performed by trained and qualified personnel. It is strongly recommended that a licensed and certified professional structural engineer approve the mounting. Severe injury and/or loss of life may occur if this product is improperly installed.
PRODUCT NAMING CONVENTION

I SERIES presents a logical way of easily deciphering each model’s characteristics (family, type, level, number and size of woofer, crossover bands, and horn pattern). The diagram at right demonstrates the product naming convention behind each model.

IP8-1122/96B translates as:
- I SERIES Point Source 800
- Single 12-inch Two-way, 90° x 60°, Black

PRODUCT REPRESENTATION

I SERIES LOUDSPEAKER (2-WAY TYPICAL)

Models: IP8-1122/xx, IP8-1152/xx, IP6-1122/xx, IP6-1152/xx - each model has 6 horn patterns

I SERIES LOUDSPEAKER (3-WAY TYPICAL)

Models: IP8-1153/xx - 3 horn patterns
PRODUCT REPRESENTATION
MID-HIGH FREQUENCY LOUDSPEAKER
Models: IP8-0002/xx - 3 horn patterns

LOW FREQUENCY LOUDSPEAKER
Model: IP8-1151

SINGLE DRIVER SUBWOOFER (TYPICAL)
Models: IS8-112, IS8-115, IS8-118, IS6-112, IS6-115, IS6-118
PRODUCT REPRESENTATION
DUAL DRIVER SUBWOOFER (TYPICAL)
Models: IS8-212, IS8-215, IS8-218, IS6-212, IS6-215, IS6-218

EQUIPMENT BASICS

Note: Weather-resistant (WR) models are ordered preconfigured and prewired for single amp/passive connections* (without an input panel). The WR models have a 12 ft (3.6m) 14 ga cable though a sealed gland nut and cover for connection to the amplifier.

* The IP8-1153WR standard configuration is biamp - see wiring detail on next page
CONNECTIONS AND INSTALLATION

USE THE CORRECT WIRE OR CABLE

All I SERIES loudspeakers are fitted with captive-clamp terminal blocks on the input panel to connect to the amplifier. Terminating the wires with a spade or ring connector (Figure 1a.) is recommended for secure connections. The maximum width of the ring or spade lug should be 0.375" (9.5mm), or less. The terminal screws are #8 (M4). The maximum wire size that can be accommodated for bare wire connections is 10 AWG (5.26 mm²).

Note: Wire insulation colors may vary depending upon region or manufacturer. Be consistent with conductor color use throughout the system.

CONNECTION: WEATHER-RESISTANT (WR) MODELS

Weather-resistant (WR) I SERIES models are ordered preconfigured for passive* operation and have 12' (3.6m) 14 ga cable(s) passing through sealed gland nut(s) and the input panel cover (Figures 1b-1c). Do not remove the gland nut or input panel cover as this will defeat the weather-resistance of the connection. If you must remove the input panel or gland nut, it must be reattached and resealed with a silicone or other similar sealant to maintain the weather-resistance of the loudspeaker.

*Note: Passive, single amp (2 conductor) wiring is standard for all weather-resistant (WR) 2-way full range loudspeakers and subwoofers. Biamp configuration is standard for the IP8-1153WR models. Contact Community for any other wiring configuration for I SERIES WR (IP, IS) models.

Please contact Community for pricing and availability for all non-standard (biamp or triamp) configurations before placing an order.
**CONNECTION: LOUDSPEAKER INPUT PANEL (INDOOR MODELS)**

The input panels on the two-way loudspeakers can be wired in passive or biamp configurations. The three-way can be wired in biamp or triamp modes. The dual subwoofers can be wired in single amp or dual amp modes. The input panels on these models have a jumper that must be placed correctly in order for it to function in the designated mode. See Figures 2a-2d for the jumper positions.

---

**PASSIVE**

**BIAMP**

**IP8-0002 BIAMP**

---

**Figure 2a. Two-way input panel**

Jumper down for Passive operation. Jumper up (or removed) for Biamp operation.

---

**IMPORTANT:** All electrical installation connections for loudspeaker lines are subject to all applicable governmental building and fire codes. The selection of appropriate electrical hardware to interface with the I SERIES loudspeaker lies solely with the installation professional. Community recommends that an appropriately licensed engineer, electrician, or other qualified professional identify and select the appropriate conduit, fittings, wire, etc. for the installation.
Figure 2b. Three-way input panel (IP8-1153)
   Jumper down for Biamp operation.
   Jumper up (or removed) for Triamp operation.

   No Jumper

Figure 2d. Dual driver subwoofer input panel
   Jumper down for Single Amp operation.
   Jumper up (or removed) for Dual Amp operation.
GRILLE REMOVAL / HORN ROTATION

The horns on full-range loudspeakers (IP6/8-1122, IP6/8-1152, IP8-1153 and IP8-0002) can be rotated 90° by removing the grille, rotating the horn and then reinstalling the horn and grille.

Remove the screws holding one Community grille retention bar to the cabinet. Remove the bar and loosen the grille. Then remove the other retention bar and pull the grille off and set aside. Keep the rubber extrusions protecting the top and bottom edges of the grille in place (Figures 3a, 3b).

Remove the screws and washers holding the horn in place (Figure 3c).

Carefully pull the horn forward, rotate it 90° and push back into place, aligning the screw holes (Figure 3d).

Reattach the horn using the same washer and screw combination (Figure 3e).

Flex the grille slightly to fit it back on the cabinet (one side at a time). Reattach one grille retention bar, then flex the grille, align and attach the other side. Fully tighten the screws only after both sides have been secured (Figure 3f).

Note: The grille retention bars will only align with the threaded inserts in one direction - refer to the product view for orientation. All fasteners should be in place and fully tightened to prevent any undesirable noise from vibration.
SUBWOOFER FOOT ATTACHMENT

All of the subwoofers come with four (4) rubber feet that may be attached to the top, bottom or sides of the cabinet. Each side has dimples to indicate foot positions.

Determine which side will be on the floor, turn the enclosure to allow easy access to attach the feet.

Attach the feet at the dimple locations (Figures 4a - 4c). Predrilling cabinet is recommended for easier attachment. Using a 1/8" (2mm) drill bit, predrill the dimple locations (to a depth of 0.5" [13mm]).

Note: The large subwoofers are heavy. Protect the finish by keeping the other sides of the enclosure in plastic or cardboard until the feet have been installed and it has been moved to the intended location.

Figure 4a. Dimple locations

Figure 4b. Attach the rubber feet

Figure 4c. All feet attached
RIGGING SAFETY

**IMPORTANT:** The loudspeakers described in this manual are designed and intended to be mounted to differing building surfaces using a variety of rigging hardware, means and methods. Installation of loudspeakers should only be performed by trained and qualified personnel. It is strongly recommended that a licensed and certified professional structural engineer approve the mounting plan. Severe injury and/or loss of life, and property damage may occur if these products are improperly installed.

**DANGER:** All rigging fittings must be fully tightened and secured. Any missing fasteners will compromise the structural integrity of the enclosure and constitute a safety hazard. Do not suspend any loudspeakers unless all fasteners are securely in place!

**ACCEPTABLE MOUNTING POINT LOADING**

The mounting points should always be used so that either shear force is applied perpendicular to the direction of and in tight proximity to the mounting hole, or tension force is applied perpendicular to the enclosure surface.

**DANGER:** Use the mounting points only as described above. Do not use them in such a way as to apply sideways leverage to them. Failure to follow this instruction could result in immediate failure of the mounting points resulting in damage to the loudspeaker and serious injury or death to personnel.

**ATTACH SAFETY CABLE**

Attach a safety cable to one of the unused mounting points. The safety cable and hardware are not included. Please consult a structural engineer for the appropriate cable and hardware for the load and application. The safety cable must be secured to a suitable load-bearing point separate from the loudspeaker mounting point, with as little slack as possible, so as not to develop undue kinetic force if the loudspeaker mount were to fail.

**WARNING:** I SERIES rigging fittings are rated at a Working Load Limit (WLL) of 225 lbs (102.1 kg) with a 10:1 safety margin. No single rigging fitting should ever be subjected to a load that is greater than this stated limit. Failure to heed this warning could result in injury or death!

**IMPORTANT:** The M10 flat-head hex-drive rigging screws that come installed in each enclosure must either be replaced with rigging brackets and threaded fasteners, or they must be kept in place to seal the enclosure from air leaks. If the rigging fittings do not remain sealed, air leaks will occur in the enclosure that will compromise the low-frequency performance with distortion, reduced output, and premature driver failure.

---

Figure 5. IP8-1152 shown mounted to the IUB1152 U-bracket. Use one of the rear or top mounting points to secure the safety cable to the structure.
BALANCEPOINT™ FLYWARE GUIDE
Refer to the I SERIES BalancePoint™ Flyware Accessory Guide for an inclusive installation guide for all of the kits.

**BalancePoint™ Fly Rails**

- **BFR22H**: BalancePoint™ Horizontal Fly Rails - fly a single enclosure (landscape orientation)
- **BFR22V**: BalancePoint™ Vertical Fly Rails - fly a single enclosure (portrait orientation)
- **SBR54**: Subwoofer behind BalancePoint™ Fly Rails (54") - adds one or two subwoofers behind any array configuration

**Horizontal Array Kits**

- **IAF40 (2-way), IAF55 (3-way)**: Isometric Array Frames - for two to three loudspeakers in portrait or landscape orientation (Requires U-Brackets or Vertical yokes)
- **HSB-BFR22 (2-way), HSB3-BFR22 (3-way)**: Dual Horizontal Splay Kits - horizontally array two full-range models
- **HAB-BFR38 (2-way), HAB3-BFR38 (3-way)**: Horizontal Array Brackets with BalancePoint™ Fly Rails Kit - to array two full-range cabinets with a subwoofer in between
- **HSB-SBR54 (2-way), HSB3-SBR54 (3-way)**: Horizontal Splay Brackets with BalancePoint™ Fly Rails Kit - to array two full-range loudspeakers with subwoofer(s) behind

**Vertical Array Kits**

- **VSB-BFR22 (2-way), VSB3-BFR22 (3-way)**: Vertical Splay Kits - to vertically array two full-range models
- **VSB-SBR54 (2-way), VSB3-SBR54 (3-way)**: Vertical Splay Brackets with BalancePoint™ Fly Rails - to array two full-range loudspeakers with subwoofer behind
- **VAB-BFR38**: Vertical Array Brackets with BalancePoint™ Fly Rails Kit - mount and aim a full-range cabinet under a subwoofer
- **DVS-BFR22**: Dual Vertical Splay with BalancePoint™ Fly Rails - to vertically array and aim two loudspeakers or loudspeaker/subwoofer combination (Can also be used with one or two U-Brackets)

**U-Brackets and Vertical Yokes**

- **IUB1122, IUB1152, IUB1153**: U-Brackets - mount and aim single full-range loudspeakers
- **IUB1122WRG, IUB1152WRG, IUB1153WRG, IUB0002WRG, IUB112SWRG**: Stainless steel U-Brackets for weather-resistant versions of loudspeakers and subwoofers
- **IVY1122, IVY1152, IVY1153, IVY0002**: Vertical yokes - vertically mount and aim single full-range loudspeakers (model specific)

**Array Accessory Kits**

- **DFS**: Downfill Splay Bracket - to add a downfill loudspeaker to any array
- **HVS (2-way), HVS3 (3-way)**: Horizontal/Vertical Splay Brackets - to add one additional loudspeaker to an array
- **TPK**: Tight Pack Kit - to connect any pair of loudspeakers or subwoofers that share common suspension points

Refer to the I SERIES BalancePoint™ Flyware Accessory Guide for an inclusive installation guide for all of the kits.
LOUDSPEAKER CABINET PAINTING PROCEDURE

I SERIES cabinets are available in standard colors of Black and White; custom colors may be ordered as Configured-to-Order items. The cabinet finish is a resilient water-based paint that makes an excellent substrate to accept most types of paints, allowing custom colors to be applied in the field. If you are considering painting the cabinet, we recommend ordering the White version of the cabinet for the most predictable results when color-matching existing colors. A Black or White replacement grille cloth kit should also be ordered. For most custom colors, black grille cloth is recommended. The kit also includes replacement soft plastic trim strip (to fit upper/lower edges of grille).

Follow grille removal instructions (Figure 6a) and reserve hardware for reattachment.

⚠️ Warning: The grille edges are sharp! Use care when handling the unprotected edges of the grille to prevent injury.

CABINET

Mask off the input panel, woofer and horn (Figure 6b). Paint the cabinet and allow the paint to fully cure.

![Figure 6a. Remove one retention bar, loosen that side of the grille and then remove the other retention bar](image)

![Figure 6b. Mask off the internal components and rear input panel.](image)

GRILLE AND ALUMINUM RETENTION STRIPS

The grille and aluminum retention strips must be removed and painted separately. To paint the grille, carefully remove the grille cloth backing and the soft plastic strip protecting the top and bottom edges (Figure 6c).

Use paint that is compatible with powder coating, and paint the outside (front and sides) of the grille and allow the paint to fully cure. Do not paint the cloth or rubber trim. Paint the front and edges of the grille retainers with the same paint used on the grille. Allow paint to fully cure before reassembling.

![Figure 6c. Remove trim strips and grille cloth](image)
GRILLE CLOTH REPLACEMENT

Apply a fine mist of spray adhesive to the inside surface of the grille including the inside corners. Do not clog the perforations.

Position the grille cloth so that the side with the tighter, smoother weave faces the rear side of the grille. Hold the corners of the cloth and place it onto the center, inside of the grille (Figure 7a). The cloth will be oversized.

Align the edges, and spread the cloth toward the sides one side at a time, while smoothing out any ripples (Figure 7b-1).

Bring the excess cloth edge up and over the sides of the grille making sure that the cloth is fully adhered to the inside corners and edges of the grille (Figure 7b-2). Trim the side edges of the cloth to leave 0.5” (13mm) to wrap over the edge. Apply a bead of adhesive to the outside edge of the grille sides (about 1/4” (7mm) from the top), and fold the grille cloth over to adhere the edge.

Trim the top and bottom of the cloth to be even with those edges (Figure 7c) and make sure that the cloth is fully adhered to the grille without any wrinkles.

One end at a time, fit the soft plastic trim strips on the top and bottom edges of the grille (Figure 7d) and secure the ends and corner bends with small amounts of cyanoacrylate adhesive (commonly known as "Super Glue"). Trim excess after it is fitted onto the grille edges.

Follow the manufacturer’s instructions and allow the adhesives to fully cure before reattaching the grille to the loudspeaker cabinet (Figure 7e).

---

**Warning:** The grille edges are sharp! Use care when handling the unprotected edges of the grille to prevent injury.

**Note:** Order the hydrophobically treated grille cloth replacement kit for any weather-resistant models.
**PERFORMANCE AND SPECIFICATIONS**

**USE A DIGITAL SIGNAL PROCESSOR**

For best performance, loudspeaker protection and system longevity, a **digital signal processor (DSP)** must be used with all I SERIES loudspeakers. Community’s dSPEC226 processor(s) and Resyn® software contain all of the information (high pass filters, limiters, factory tunings) and DSP settings to fully optimize your system. For more information on installing and operating your I SERIES loudspeaker, please refer to Community’s website at communitypro.com, or contact our Technical Applications Group (TAG) at tagteam@communitypro.com, or by phone at 610-876-3400 or toll-free (within the US and Canada) at 800-523-4934.

**SPECIFICATIONS AND INFORMATION**

Full product specifications and current documentation (manuals, sales literature) is available at communitypro.com. Additional technical information to assist you in operating and optimizing your system or understanding more about loudspeaker operation is also available on the website or by contacting the Technical Applications Group (TAG).

**Horn patterns are H° x V°

Standard cabinet orientation for indoor models is vertical, and horizontal for WR (outdoor) models.
CUSTOMER SUPPORT

FOR MORE INFORMATION AND APPLICATION ASSISTANCE

For more information on installing and operating your I SERIES loudspeaker, please refer to Community’s website at www.communitypro.com.

For application support, service or warranty information, refer to Community’s website or contact Community at 610-876-3400 or toll-free (within the US and Canada) at 800-523-4934.

WARRANTY INFORMATION

TRANSFERABLE WARRANTY “(LIMITED)” VALID IN THE USA ONLY

The I SERIES loudspeakers are designed and backed by Community Professional Loudspeakers. For complete warranty information within the USA please refer to www.communitypro.com/warranty-statement. Please call 610-876-3400 or visit the website to locate your nearest Authorized Field Service Station. For Factory Service call 610-876-3400. You must obtain a Return Authorization (R/A) number prior to the return of your product for factory service.

WARRANTY INFORMATION AND SERVICE
FOR COUNTRIES OUTSIDE THE USA

To obtain specific warranty information and available service locations for countries other than the United States of America, contact the authorized Community Distributor for your specific country or region.

SHIPPING DAMAGE / CLAIMS

If the product is damaged during transit you must file a damage claim directly with the freight company. It’s very important to contact the freight company as soon as possible after receiving your shipment, as most freight companies have a short time limit within which they will investigate claims. Be sure to save the carton and packing materials, as damage claims can be denied if these materials are not retained. If evidence of physical damage exists upon arrival, be cautious before signing the delivery acceptance receipt. Often, the fine print will waive your right to file a claim for damage or loss after you sign it. Make sure that the number of cartons shown on the freight documents have actually been delivered.

Note: Every effort has been made to insure that the information contained in this manual was complete and accurate at the time of printing. However, due to ongoing technical advances, changes or modifications may have occurred that are not covered in this manual. The latest version is available at communitypro.com.
