DESCRIPTION

The M200 midrange compression driver is a high output, high sensitivity loudspeaker excelling in applications ranging from voice only announcement through three or four-way full-range high fidelity concert music systems. The M200 is configured so that the diaphragm faces forward, isolating the voice coil and the gap from the environment. Community drivers incorporate large area, low compression phase plug loading and large magnet structures for extremely low distortion at high outputs while maintaining high efficiency and low power compression. There is a two year warranty.

APPLICATIONS:
• Voice Announcement Systems
• Large Public Gatherings
• Houses of Worship
• Multit-way Component High Fidelity Systems
• Industrial Paging
• Humid or Toxic Environments

FEATURES:
• 2 in. (51 mm) Throat Exit
• Low Distortion, High Efficiency
• High Power Output
• Non-metallic Diaphragm
• Immunity to Adverse Environments

SPECIFICATIONS (See notes 1 - 3)

Driver Type: 2 in. / 51 mm exit, mid-range
Operating Range: 400 Hz - 8 kHz (with equalization)
500 Hz - 4 kHz (+/-3.2dB)
Max Input Ratings:
75W continuous, 200W Program
24 volts RMS, 57 volts momentary peak
Recommended Power Amplifier:
170W to 240W @ 8 Ohms
Sensitivity 1W/1m:
110 dB SPL (400 Hz - 4 kHz 1/3 octave bands)
Maximum Output:
129 dB SPL / 136 dB SPL (peak)
Nominal Impedance: 8 Ohms
Min Impedance: 11.6 Ohms @ 2.4 kHz
Compression Ratio: 1.84:1
Lowest / Highest Crossover Frequencies:
400 Hz / 8 kHz
Optimum Crossover Frequencies:
500 Hz / 4 kHz
Recommended LF Protection Capacitor: *
80 mfd non-polar (for 500 Hz crossover)
Diaphragm:
Diameter: 2.2 in. / 56 mm
Material: Non-metallic
Voice Coil:
Diameter: 2.2 in. / 56 mm
Material: Copper-clad aluminum edgewound wire on Kapton former
Input Connection:
(2) 3/16 in. wide solder tabs
Bolt Pattern:
(4) 1/4-20 threaded studs on 4 in. / 102 mm bolt circle
Required Accessories:
Electronic crossover
Supplied Accessories:
(4) 1/4-20 washer / lockwasher / nut sets
Recommended Community Horns:
PC294 - 90 x 40 large format midrange or voice only horn
PC264 - 60 x 40 large format midrange or voice only horn
PC242 - 40 x 20 large format midrange or voice only horn
SH494 - 90 x 40 medium format voice-only mid/high horn
Dimensions (without mounting studs):
Depth: 2 in. / 51 mm
(3 in. / 76 mm with mounting studs)
Diameter: 5.5 in. / 140 mm
Weight: 8 lb. / 3.6 kg
Shipping Weight: 10 lb. / 4.5 kg

Notes:
1. Sensitivity: Free field pink noise measurement at 40 ft / 12.2 m at 10% power; extrapolated to 1 meter and an input of 2.83 volts RMS.
2. Watts: All wattage figures are calculated using the rated nominal impedance.
3. Data: All performance data measured on a SH494 90 x 40 horn.

* Capacitor is only for protection against DC voltage or catastrophic amplifier failure and not to be used as a crossover.

© 1999, Community Light & Sound, Inc.
The driver shall be a 2 inch (51 mm) exit compression type, specifically designed for midrange frequency response. On an SH494 horn the driver shall have an amplitude response of 500 Hz to 4 kHz dB (+/- 3.2 dB), input capability of 24V RMS, 110 dB sensitivity at 1 meter / 2.83V, and a nominal impedance of 8 Ohms. The driver shall incorporate a large magnet structure, a one-piece, non-metallic diaphragm / suspension, and a copper-clad aluminum edgewound voice coil on a Kapton former immersed in Ferrofluid. The compression ratio shall be 1.84 to 1. The diaphragm assembly shall be field replaceable. The driver shall be 5.5 in. (140 mm) diameter, 2 in. (51 mm) deep plus 1 in. (25 mm) mounting stud projection, and weigh 8 lb. (3.6 kg).
