**DESCRIPTION**

The MVP15HO is a rugged, high-efficiency, two-way, full-range loudspeaker system. The system utilizes one HF20 high-frequency driver coupled to a Pattern Control horn and one 15" cast frame woofer for high efficiency and excellent power handling capability. These components are matched to an optimally tuned direct radiating bass-reflex enclosure. The recessed handles, black carpeted exterior and injection molded corners also make this system attractive and rugged.

The MVP15HO offers a robust internal crossover with Thermal Link™ HF Driver Protection. The crossover is built to last with high quality inductors, precision wound coils and military grade circuit boards. The proprietary Thermal Link Dynamic HF Driver Protection circuit provides both over-current and thermal protection for added performance and reliability.
