DESCRIPTION
The MVP25 is a rugged, high-sensitivity, two-way, full-range loudspeaker system. The system utilizes one LM20™ proprietary high-frequency compression driver coupled to an exponential horn and one 12” woofer for high sensitivity and excellent power handling capability. These components are matched to an optimally tuned direct radiating bass reflex enclosure. The recessed handles, black carpeted exterior and injection molded corners also make this system attractive, rugged and easily transportable.

The MVP25 offers a robust internal crossover with Thermal Link™ Dynamic HF Driver Protection. The crossover is built to last with high quality inductors, precision wound coils and military grade circuit boards. The proprietary Thermal Link™ Dynamic HF Driver Protection circuit provides both over-current and thermal protection for added performance and reliability. Designed as a stand-alone full-range loudspeaker system, the MVP25 offers enough bass for most foreground/background and speech reinforcement applications. For more demanding applications, extended bass can be achieved by adding a MVP subwoofer. Installation is easily accomplished utilizing the threaded inserts provided and optional mounting kits.
