DESCRIPTION

The PC1542M horn with the PCMX mouth extension is designed by Community to function as a midrange horn in a multi-way component system or a stand-alone, high-power paging horn. Mated with a Community M4 compression driver it will provide focused, extremely high output sound projection, with predictable performance and exceptional long term durability for professional sound reinforcement systems. Performance data for Community horns is well documented, providing the designer and consultant with highly predictable and consistent coverage patterns for system design.

Each horn is a handcrafted, one-piece, precision waveguide, precision molded in hand-laminated, fiber-reinforced fiberglass. Balsa wood is embedded in the sidewalls for non-diaphragmatic, resonant-free operation. With substantial fiberglass layering and integral throat and driver flange construction, Community horns are built to withstand the torque loads of the heaviest compression drivers. Their inherent strength and rigidity enhances sonic efficiency by preventing sound energy losses through the horn walls or from vibration. Community fiberglass horns are inherently weather-proof under all conditions of use and carry a 5 year warranty. There is a five year warranty.

APPLICATIONS:

- Concerts
- Voice Announcement
- Large Public Gatherings
- Houses of Worship
- Arenas
- Stadia

FEATURES:

- Strong, Lightweight, Weather Resistant Fiberglass Construction
- Long Distance Projection Capability
- Precise Horizontal and Vertical Control Maintains Consistent On and Off Axis Frequency Response
- Accepts Co-Axially Mounted Bracket and HF Horn

SPECIFICATIONS (See notes 1 - 4)

Horn Type: Pattern Control, Mid-frequency horn
Operating Range: 200 Hz - 2.5 kHz
Usable LF Limit: 130 Hz
Flare Rate: 110 Hz
Throat Diameter: 4 in. / 102 mm
Axial Sensitivity 1W/1m (with M4 driver):
  117 dB SPL (200 Hz - 2 kHz 1/3 octave bands)
Maximum Output (with M4 driver):
  140 dB SPL / 147 dB SPL peak
Nominal -6 dB Beamwidth:
  Horizontal: 40° (+15° / -3°, 500 Hz - 2.5 kHz)
  Vertical: 20° (+19° / -0°, 800 Hz - 2.5 kHz)
Axial Q: 45.1 (500 Hz - 2.5 kHz)
Axial DI: 16.5 (500 Hz - 2.5 kHz)
Recommended Signal Processing (for M4 driver):
  225 Hz and 2 kHz crossover points in a system
  200 Hz high pass filter for stand-alone operation
Construction:
  Hand-laminated, reinforced composite, black fiberglass
  Double wall construction using embedded balsa wood
Required Accessories:
  Electronic crossover, Equalization
Optional Accessories:
  PCMX: Mouth extension for 225 Hz operation; highly recommended for optimum performance.
  DSC42: Digital crossover / processor
  M4Y0KE: Rear mounting bracket
  (add'l front support required)
  M4COAXBKT: Coaxially mounts PC400 series horn in mouth
  TRC400: 400W line transformer
Bolt Pattern:
  (6) 5/16 in / 8 mm holes on 12 in / 305 mm bolt circle
Dimensions (without driver):
  Height: 44 in. / 1118 mm
  (28.5 in. / 724 mm without PCMX)
  Width: 44 in. / 1118 mm
  (28.5 in. / 724 mm without PCMX)
  Depth: 55.25 in. / 1403 mm
  (49.25 in. / 1251 mm without PCMX)
Weight:
  99 lb. / 44.9 kg (61 lb. / 27.7 kg without PCMX)
Shipping Weight:
  70 lb. / 31.8 kg
PCMX Weight:
  38 lb. / 17.2 kg
PCMX Shipping Weight:
  42 lb. / 19.1 kg

1. Sensitivity: Free field pink noise measurement at 40 ft / 12.2 m at 10% power; extrapolated to 1 meter and an input of 2.83 volts RMS. 0 dB SPL = 20 uPa.
2. Watts: All wattage figures are calculated using the rated nominal impedance.
3. PCMX: Specifications are with PCMX extension, recommended for optimum performance.
4. EQ: Specifications are without equalization, normally required for optimum performance.

PC1542M with PMX Page 1 of 2
The horn shall be a 4 inch throat entrance, Pattern Control, midrange device. The horn and the PCMX mouth extension shall each be made as one piece using hand-laminated fiberglass, with double wall constructions formed by resin-encapsulated, sandwich core wood. The PCMX mouth extension shall be joined to the horn with provided hardware. The horn shall include an integral cupped rear flange for mounting the M4 4 inch exit compression driver and a flat, front flange to facilitate mounting. The usable operating range shall be from 200 Hz to 2.5 kHz with nominal -6 dB beamwidths of 40° horizontal, deviating no more than +15° / -3° between 500 Hz and 2.5 kHz, and 20° vertical, deviating no more than +19° / -0° between 800 Hz and 2.5 kHz. The horn with the PCMX extension shall be 44 in (1118 mm) H x 44 in (1118 mm) W x 55.25 in (1403 mm) D and weigh 99 lb (44.9 kg). The horn without the PCMX extension shall be 28.5 in (724 mm) H x 28.5 in (724 mm) W x 49.25 in (1251 mm) D and weigh 61 lb (27.7 kg).

Architects' and Engineers' Specifications

The horn shall be a 4 inch throat entrance, Pattern Control, midrange device. The horn and the PCMX mouth extension shall each be made as one piece using hand-laminated fiberglass, with double wall constructions formed by resin-encapsulated, sandwich core wood. The PCMX mouth extension shall be joined to the horn with provided hardware. The horn shall include an integral cupped rear flange for mounting the M4 4 inch exit compression driver and a flat, front flange to facilitate mounting. The usable operating range shall be from 200 Hz to 2.5 kHz with nominal -6 dB beamwidths of 40° horizontal, deviating no more than +15° / -3° between 500 Hz and 2.5 kHz, and 20° vertical, deviating no more than +19° / -0° between 800 Hz and 2.5 kHz. The horn with the PCMX extension shall be 44 in (1118 mm) H x 44 in (1118 mm) W x 55.25 in (1403 mm) D and weigh 99 lb (44.9 kg). The horn without the PCMX extension shall be 28.5 in (724 mm) H x 28.5 in (724 mm) W x 49.25 in (1251 mm) D and weigh 61 lb (27.7 kg).
