The PC1594M horn with the PCMX mouth extension is designed by Community to function as a midrange horn in a multi-way component system or a stand-alone, high-power paging horn. Mated with a Community M4 compression driver it will provide focused, extremely high output sound projection, with predictable performance and exceptional long term durability for professional sound reinforcement systems. Performance data for Community horns is well documented, providing the designer and consultant with highly predictable and consistent coverage patterns for system design.

Each horn is a handcrafted, one-piece, precision waveguide, precision molded in hand-laminated, fiber-reinforced fiberglass. Balsa wood is embedded in the sidewalls for non-diaphragmatic, resonant-free operation. With substantial fiberglass layering and integral throat and driver flange construction, Community horns are built to withstand the torque loads of the heaviest compression drivers. Their inherent strength and rigidity enhances sonic efficiency by preventing sound energy losses through the horn walls or from vibration. Community fiberglass horns are inherently weather-proof under all conditions of use. There is a five year warranty.

### SPECIFICATIONS (See notes 1 - 4)

- **Horn Type:** Pattern Control, Mid-frequency horn
- **Operating Range:** 200 Hz - 2.5 kHz
- **Usable LF Limit:** 200 Hz
- **Flare Rate:** 180 Hz
- **Throat Diameter:** 4 in. / 102 mm
- **Axial Sensitivity 1W/1m (with M4 driver):**
  - 114 dB SPL (200 Hz - 2 kHz 1/3 octave bands)
- **Maximum Output (with M4 driver):**
  - 137 dB SPL / 144 dB SPL peak
- **Nominal -6 dB Beamwidth:**
  - Horizontal: 80° (+4° / -19°, 315 Hz - 2.5 kHz)
  - Vertical: 40° (+13° / -14°, 500 Hz - 2.5 kHz)
- **Axial Q:** 20.1 (315 Hz - 2.5 kHz)
- **Axial DI:** 13 (315 Hz - 2.5 kHz)
- **Recommended Signal Processing (for M4 driver):**
  - 225 Hz and 2 kHz crossover points in a system
  - 200 Hz high pass filter for stand-alone operation
- **Construction:** Hand-laminated, reinforced composite, black fiberglass
  - Double wall construction using embedded balsa wood
- **Required Accessories:** Electronic crossover, Equalization
- **Optional Accessories:**
  - PCMX: Mouth extension for 225 Hz operation; highly recommended for optimum performance
  - DSC42: Digital crossover / processor
  - M4YOKE: Rear mounting bracket (add'l front support required)
  - M4COAXBKT: Coaxially mounts PC400 series horn in mouth
  - TRC400: 400W line transformer
- **Bolt Pattern:**
  - (6) 5/16 in / 8 mm holes on 12 in / 305 mm bolt circle
- **Dimensions (without driver):**
  - Height: 44 in. / 1118 mm
    - (28.5 in. / 724 mm without PCMX)
  - Width: 44 in. / 1118 mm
    - (28.5 in. / 724 mm without PCMX)
  - Depth: 41 in. / 1041 mm
    - (35 in. / 889 mm without PCMX)
- **Weight:** 84 lb. / 38.1 kg (46 lb. / 20.9 kg without PCMX)
- **Shipping Weight:** 52 lb. / 23.6 kg
- **PCMX Weight:** 38 lb. / 17.2 kg
- **PCMX Shipping Weight:** 42 lb. / 19.1 kg

### APPLICATIONS:
- Concerts
- Voice Announcement
- Large Public Gatherings
- Houses of Worship
- Arenas
- Stadia

### FEATURES:
- Strong, Lightweight, Weather Resistant Fiberglass Construction
- Long Distance Projection Capability
- Precise Horizontal and Vertical Control Maintains Consistent On and Off Axis Frequency Response
- Accepts Co-Axially Mounted Bracket and HF Horn

### DESCRIPTION

The PC1594M horn with the PCMX mouth extension is designed by Community to function as a midrange horn in a multi-way component system or a stand-alone, high-power paging horn. Mated with a Community M4 compression driver it will provide focused, extremely high output sound projection, with predictable performance and exceptional long term durability for professional sound reinforcement systems. Performance data for Community horns is well documented, providing the designer and consultant with highly predictable and consistent coverage patterns for system design.

Each horn is a handcrafted, one-piece, precision waveguide, precision molded in hand-laminated, fiber-reinforced fiberglass. Balsa wood is embedded in the sidewalls for non-diaphragmatic, resonant-free operation. With substantial fiberglass layering and integral throat and driver flange construction, Community horns are built to withstand the torque loads of the heaviest compression drivers. Their inherent strength and rigidity enhances sonic efficiency by preventing sound energy losses through the horn walls or from vibration. Community fiberglass horns are inherently weather-proof under all conditions of use. There is a five year warranty.
The horn shall be a 4 inch throat entrance, Pattern Control, midrange device. The horn and the PCMX mouth extension shall each be made as one piece using hand-laminated fiberglass, with double wall constructions formed by resin-encapsulated, sandwich core wood. The PCMX mouth extension shall be joined to the horn with provided hardware. The horn shall include an integral cupped rear flange for mounting the M4 4 inch exit compression driver and a flat, front flange to facilitate mounting. The usable operating range shall be from 200 Hz to 2.5 kHz with nominal -6 dB beamwidths of 80° horizontal, deviating no more than +4° / -19° between 315 Hz and 2.5 kHz, and 40° vertical, deviating no more than +13° / -14° between 500 Hz and 2.5 kHz. The horn with the PCMX extension shall be 44 in. (1118 mm) H x 44 in. (1118 mm) W x 41 in. (1041 mm) D, and weigh 84 lb. (38.1 kg). The horn without the PCMX extension shall be 28.5 in (724 mm) H x 28.5 in (724 mm) W x 35 in. (889 mm) D and weigh 46 lb. (20.9 kg).
