**DESCRIPTION**
The R.5SUB system is engineered to provide quality low frequency reproduction in a variety of outdoor and indoor environments. Its compact size and weather resistant properties allow for easy inclusion in a wide variety of environments. An available input transformer provides impedance matching to 70V or 100V lines. Five year limited warranty.

NOTES:
1. Sensitivity: Free field pink noise measurement at 4 ft (1.2 m) at 75% power; extrapolated to 1 meter and an input of 2.4 volts RMS.
2. Watts: All wattage figures are calculated using the rated nominal impedance.
The loudspeaker system shall be a bass reflex design consisting of one 12" driver inside the cabinet. The cabinet shall be a rotomolded low linear density polyethylene enclosure providing weather and UV resistance with a three-layer weather-resistant grille. The steel grille shall be powder coated with a proprietary zinc-rich epoxy dual-layer powder coating process in light grey to color match the enclosure. The system shall have an IEC529 IP rating of IP54W with a minimum 5-degree downward aiming angle. The input connection shall be one 12' (4m) SJOW #16 gauge cable with stripped ends. For transformer version, the input connection shall be one 12' (4m) 5 conductor #18 gauge cable. The enclosure shall incorporate five 3/8-16 rigging points for multiple mounting options. In addition, the loudspeaker will be supplied with one zinc-rich epoxy dual-layer powder coated steel yoke bracket. The loudspeaker system shall have an amplitude response of 50 Hz to 100 Hz (+/- 3 dB SPL), input capability of 35 volts RMS, 91 dB SPL sensitivity at 1 meter / 2.4V and 6 ohms nominal impedance. The nominal dispersion shall be omnidirectional. The dimensions of the enclosure are defined as 16” x 16” x 16” (HWD) at a weight of 35lbs.
