**Description**

The VERIS 1264 is a two-way, full-range loudspeaker system suitable for use in a wide spectrum of fixed installations.

Compact and extremely powerful, the 1264 handles applications ranging from jazz clubs and AV presentations, to rock and roll performances.

Its trapezoidal design allows it to be clustered with like units, forming powerful arrays.

The 60° x 40° pattern makes the VERIS 1264 useful for applications requiring tight, controlled coverage such as in acoustically reflective rooms, particularly those that are deeper than they are wide.

The enclosure may be suspended from its M10 threaded rigging points using a variety of hardware available from stock, or it may be installed by using an OmniMount™️60 series mounting device.

The VERIS 1264 provides extended high frequency response, low distortion output, a tight, punchy bass response, and precise pattern control.

Featuring carefully designed crossovers that provide flat acoustic power response through the critical mid-range region, and Community's exclusive DYNA-TECH™️ dynamic driver protection circuitry, the VERIS 1264 is a versatile performer for use in music and speech applications that require high quality, high power sound reinforcement at an affordable price.

**Applications**

- Clubs
- Theatres
- Auditoria
- Worship Centers
- AV Presentations
- Fitness Centers

**Features**

Internal DYNA-TECH™️ Dynamic Driver Protection Circuitry

Black or White Finish Available

Ferrofluid Treated HF Driver for Improved Heat Dissipation

Non-Resonant, Non-Metallic HF Diaphragm for Reduced Distortion

Carbon Ring Cone Technology Provides 30% More Piston Area with Increased Excursion Capability

Terminal Strip and NL4 Compatible Connectors

**SYSTEM**

Format: Two-way full-range, vented bass, trapezoidal enclosure

Operating Range: 60 Hz - 18 kHz

Frequency Response: 90 Hz - 13 kHz (± 3 dB)

Dispersion (-6 dB): 60° H x 40° V (in vertical position)

Crossover Frequency: 1.5 kHz

Maximum SPL @1m: 122 dB continuous / 129 dB peak

Sensitivity in SPL: 99 dB (100 Hz - 12.5 kHz, 1/3 octave) 100 dB (250 Hz - 4 kHz, speech range)

Max Power Handling: 200W RMS (40V)

500W Program / 990W Peak

Impedance: Nominal 8Ω / Min. 4.1Ω at 10 kHz

Connectors: Terminal Strip and NL4 Compatible

**TRANSDUCERS**

Low Frequency: 12" (304mm) 200W RMS

500W Program, 8Ω

High Frequency: 1" (25.4mm) 50W RMS

125W Program, 4Ω

**MECHANICAL**

Enclosure: Trapezoidal (22.5° included angle) 11-ply cross-laminated birch

Finish: Black or white catalyzed polyester paint (specify at time of ordering)

Rigging Provisions: (13) M10 threaded rigging fittings

(4) M8 threaded fittings for OmniMount™️60 bolt pattern

Grille: Powder coated steel, black or white

Dimensions: 23.9" (607mm) x 15.4" (390mm) x 14.3" (362mm)

Net Weight: 36.5 lbs / 16.6 kg

Due to ongoing development, specifications are subject to change without notice.

*100 lbs / 45.4 kg per point in straight line, 10:1 safety factor.*
VERIS 1264 TWO-WAY FULL-RANGE LOUDSPEAKER SYSTEM

Impedance versus Frequency

Directivity Index

Axial Q

Recommended Power: 420 - 600 WRMS at 8Ω
Recommended High-Pass Filter: 60 Hz*

*24 dB / octave or higher

Installation Accessories

Vertical Fly Kit
One kit arrays two enclosures; two kits array three enclosures, and so on.

Seat Track Kit
Quick and easy way to fly VERIS enclosures.

Tilting Bracket
Allows precise angling of a VERIS loudspeaker.

Yoke Bracket
Provides 0°, 10°, & 20° inclination to wall surface.

Tilting Brackets
Multiple brackets may be used to position one loudspeaker below another.

Eyebolt Kits
Suspend VERIS enclosures safely and easily.

Ceiling Mount Kit
Derives a hang point from a ceiling surface.
