**Description**

The VERIS 26T is a two-way, full-range loudspeaker system suitable for use in a wide range of constant voltage applications.

Its low-loss, low distortion internal autoformer provides the system designer with great flexibility. The four power taps allow a 9 dB range of level control in 3 dB increments.

The versatile 26T is ideal for distributed systems such as those found in cafes, restaurants, shopping centers and airports. With its powerful dual cone drivers, the VERIS 26T provides additional low frequency and mid-range output over that of its sister product, the VERIS 6T.

When paired with a subwoofer such as the VERIS 210S, a VERIS 26T system will produce high-fidelity, broad spectrum sound that belies its modest size.

In addition to distributed systems, the VERIS 26T is an excellent choice for ancillary delay applications. When used to augment a FOH system in venues such as auditoria, theaters, and houses of worship, delay speakers can significantly even-out the difference in sound pressure level from the front of the room to the rear of the room. Units may be positioned for under-balcony fill, over-balcony fill, or simply placed towards the rear of the seating areas. By deploying VERIS 26T loudspeakers in such a manner, the system designer will have far greater control over relative levels and relative tonal response when commissioning and equalizing the installation.

The VERIS 26T may be mounted to a wall or ceiling surface with a yoke bracket (included), suspended from its M6 threaded rigging points, or installed using an OmniMount™ Series 30 mounting device.

**Applications**

- Shopping Malls
- Airports
- Delay Fill
- Restaurants
- pubs
- Cafes
- Houses of Worship

**Features**

Internal Autoformer for 70V / 100V installations

Black or White Finish Available

Ferrofluid Treated HF Driver for Improved Heat Dissipation

Non-Resonant, Non-Metallic HF Diaphragm for Reduced Distortion

Carbon Ring Cone Technology Provides 30% More Piston Area with Increased Excursion Capability

Terminal Strip Connection w/ 25W, 50W, 100W & 200W Taps

**SYSTEM**

Format: Two-way full-range, vented bass, trapezoidal, equipped with autoformer for 70V / 100V systems

Operating Range: 70 Hz - 18 kHz

Frequency Response: 90 Hz - 10 kHz (± 3 dB)

Dispersion (-6 dB): 90° H x 70° V (in vertical position)

Crossover Frequency: 2 kHz

Maximum SPL @1m: 114 dB continuous

Sensitivity in SPL:
(1W/1m, free space) 91 dB (125 Hz - 10 kHz, 1/3 octave)

Max Power Handling: 200W RMS (70V / 100V)

Autoformer Taps: 25W, 50W, 100W, 200W

Connectors: Terminal Strip

**TRANSUDCERS**

Low Frequency: Dual 8" (203mm) 150W RMS 375W Program, 8Ω

High Frequency: 3/4" (19mm) 50W RMS 125W Program, 8Ω

**MECHANICAL**

Enclosure: Trapezoidal (22.5° included angle) 11-ply cross-laminated birch

Finish: Black or white catalyzed polyester paint (specify at time of ordering)

Rigging Provisions: (9) M6 threaded rigging fittings
(4) M6 threaded fittings for OmniMount™30 bolt pattern; yoke bracket included

Grille: Powder coated steel, black or white

Dimensions: 22.5" (572mm) x 9.8" (249mm) x 10.1" (258mm)

Net Weight: 26.5 lbs / 12.0 kg

Due to ongoing development, specifications are subject to change without notice.

*100 lbs / 45.4 kg per point in straight line, 10:1 safety factor.
VERIS 26T TWO-WAY 70V / 100V LOUDSPEAKER SYSTEM

Amplitude versus Frequency (in free space)

Impedance versus Frequency

Directivity Index

Axial Q

Recommended Power: 200 WRMS at 70V
Recommended High-Pass Filter: 80 Hz*

*24 dB / octave or higher

Installation Accessories

VERIS Handle & Stand Socket
Attaches to Omni-Mount™ fasteners.

Tilting Bracket
Allows precise angling of a VERIS loudspeaker.

Seat Track Kit
Quick and easy way to fly VERIS enclosures.

Yoke Bracket
Provides 0°, 10°, & 20° inclination to wall surface.

Tilting Brackets
Multiple brackets may be used to position one loudspeaker below another.

Eyebolt Kits
Suspend VERIS enclosures safely and easily.

Ceiling Mount Kit
Derives a hang point from a ceiling surface.
