**WX-1299**  WET X FULL-RANGE TWO-WAY
12-INCH LOUDSPEAKER (90° X 90°)

**TECHNICAL SPECIFICATIONS**

**SYSTEM**
- **Loudspeaker Type:** Full-range, two-way, weather-resistant
- **Operating Range:** 40 Hz to 22 kHz (-10 dB)
- **Frequency Response:** 63 Hz to 18 kHz (-3 dB)
- **Max Input Ratings:** 600W RMS, 1200W Program
- **Nominal Impedance:** 8 ohms, 8.3 ohms @160 Hz minimum
- **Coverage Pattern:** 90° H x 90° V
- **Axial Q / DI:** 8.83 / 9.46, 2 kHz to 16 kHz
- **Crossover Frequency:** 1.5 kHz
- **Recommended High Pass:** 60 Hz 24 dB / Octave

**TRANSUDERS**

**LOW FREQUENCY**
- **Driver:** 1 x 12" cone, 3" voice coil, weather-treated
- **Sensitivity (1W / 1m):** 97 db (70 Hz - 2.2 kHz)
- **Power Capacity (Cont/Peak):** 600W / 2400W
- **Nominal Impedance:** 8 ohms

**HIGH FREQUENCY**
- **Driver:** 1 x 2.87" voice coil / 1.4" exit
- **Sensitivity (1W / 1m):** 106 dB (1 kHz - 20 kHz)
- **Power Capacity (Cont/Peak):** 90W / 360W
- **Nominal Impedance:** 8 ohms

**PHYSICAL**
- **Input Connection:** 12' (4m) SJOW #16-gauge cable with stripped ends
- **Enclosure:** Trapezoidal fiberglass outer shell and face lined and reinforced with 18mm (7-layer) marine grade plywood
- **Finish:** Black or White gel coat fiberglass
- **Mounting/Rigging Provisions:** Two 1/2"-13 rigging points; 304SS zinc-rich dual-layer powder-coated bracket included; Integral 1/2"-13 safety cable mounting point
- **Grille:** 3-Layer Weather-Stop™ backing, 304SS zinc-rich dual-layer powder-coated
- **Environmental:** IP56 per IEC 529
- **Dimensions – H x W x D:** 16" x 30.5" x 17" (horizontal orientation) 406.4 x 774.7 x 431.8 mm
- **Loudspeaker / Unit Weight:** 82 lbs (37.3 kg) / 98 lbs (44.5 kg) with bracket
- **Shipping Weight:** 122 lbs (55.3 kg)

**CONFIGURE-TO-ORDER (CTO) OPTIONS**

- **Custom Colors:** Custom color exterior-grade paint finish, RAL or custom color matching available
- **Extra Hang Points:** 2 or 3 additional per side (several options available)
- **Bi-amp:** Includes 4-conductor, 4-color SJOW cable
- **Transformer:** 70V: 400W / 200W / 100W 100V: 400W / 200W
- **Cable:** Custom length

**APPLICATIONS**
- Theme and Amusement Parks
- Outdoor Entertainment Centers
- Cruise Ships
- Multipurpose outdoor and indoor venues
- Stadiums
- Music Pavilions
- Musical Fountains
- Water Parks

**FEATURES**
- 90° x 90° horn pattern
- Large format waveguide delivers excellent pattern control
- 1.4" (36mm) exit / 2.87" (72.2mm) VC HF transducer
- 12" (305mm) / 3" VC LF weather-treated transducer
- Passive operating mode standard
- All-weather, multi-layer glass composite shell over 18mm 7-layer marine grade plywood interior
- Dual-layer powder-coated 304 stainless steel mounting bracket included
- Stainless steel hardware
- Available with optional built-in 400W transformer for 70V / 100V applications

**DESCRIPTION**

The WX-1299 is a premium quality, large format, full-range loudspeaker system. The driver complement consists of a 12" (305mm) high power low frequency driver and a 1.4" (36mm) exit / 2.87" (72.9mm) edgewound voice coil compression driver. The large format horn flare delivers well controlled 90° x 90° dispersion, and utilizes high order crossovers to minimize band overlap.

The WX-1299 is used in passive operating mode. The passive mode is designed to deliver outstanding performance without the use of a processor. A custom bi-amp option can allow greater system flexibility allowing a compatible processor to enhance the LF response.

The WX-1299 is designed to provide high quality music and voice reproduction in applications requiring extreme weather-resistance. The WET X enclosure features unmatched durability and ruggedness and is engineered for use in permanent installations.

The loudspeaker enclosure and faceplate are constructed of multi-layer glass composite lined with 18mm (7-layer) marine grade plywood, resulting in extreme structural strength. All exposed hardware is stainless steel or powder-coated aluminum extrusion. A weather-resistant 304SS, dual-layer powder-coated horizontal bracket is included for mounting.

**NOTE:** All wattage figures are calculated using the rated impedance.

ARCHITECTURAL SPECIFICATIONS
The loudspeaker system shall be a two-way, full-range bass reflex trapezoid-shaped design with one 12 in. (305mm) LF driver and one 1.4 in. exit HF driver with a titanium diaphragm mounted to a 90° x 90° HF fiberglass horn. Drivers shall be connected to an integral crossover with a crossover frequency of 1.5 kHz. The input connection shall be one 12' (4m) SJOW #16-gauge cable with stripped ends. The loudspeaker enclosure shall be a multi-layer glass composite with a 16-gauge perforated stainless steel grille backed by open cell foam and a high density polyester mesh cloth. There shall be two 1/2"-13 rigging points. 95% of the shell interior shall be lined with wood, with 18mm 7-layer cross-laminated marine grade plywood on all interior flat surfaces. All wood shall be sealed with fiberglass resin. The system shall have a frequency response of 63Hz to 18kHz (-3 dB SPL), an input capability of 69V RMS, 97 dB sensitivity at 1W / 1m at 8 ohms nominal impedance. The nominal dispersion shall be 90° H x 90° V from 2kHz to 16kHz. The loudspeaker shall be 16" (406.4mm) H (front) x 30.5" (774.7mm) W x 17" (431.8mm) D and shall weigh 82 lbs (37.3 kg).

CAUTION: Installation of loudspeakers should only be performed by trained and qualified personnel. It is strongly recommended that a licensed and certified professional structural engineer approve the mounting design.
