**DESCRIPTION**

The XLT51E is a versatile high-efficiency subwoofer designed for installation with smaller XLTE full-range loudspeaker systems for extended deep bass output in smaller installations. The black-painted 13-ply Baltic birch enclosure and black perforated steel grille present an attractive package. The XLT51E subwoofer has an integral 150 Hz high pass output filter that can be used to directly feed XLT41E or XLT42E full range systems, thus requiring only one amplifier channel to power both systems. When used with a larger XLTE full-range system, a separate amplifier channel is recommended for each system. Five year limited warranty.

**ARCHITECTS' AND ENGINEERS' SPECIFICATIONS**

The loudspeaker system shall be a subwoofer of bass reflex design with one 15 in. Ferrofluid-cooled woofer. The driver shall be connected to integral over-current protection circuitry using high positive current coefficient resistors as well as to an integral high pass filter at 150 Hz connected to high pass output jack. There shall be two NL4MP connectors and two 1/4" phone jack connectors. The loudspeaker enclosure shall be 13-ply Baltic birch plywood with a 16 gauge perforated steel grille and finished with black paint. The system shall have an amplitude response of 40 Hz to 250 Hz (+/- 5 dB), input capability of 35V RMS, 95 dB sensitivity at one meter and 2.83 V / 8 ohms nominal impedance. The nominal dispersion shall be omni-directional throughout the operating range. The loudspeaker shall be 26.9 in. (684 mm) H x 19.5 in. (494 mm) W x 17.9 in. (455 mm) D and weigh 66.5 lbs (30.2 kg).
