The i215LVS is a high power, trapezoidal, installation subwoofer designed to complement the iHP3500 Series full-range loudspeakers. The exterior dimensions of the i215LVS match those of the iHP3564 and iHP3594, thereby allowing full-range cabinets and LF sections to be combined together in aesthetically pleasing arrays/clusters that are acoustically and aesthetically designed to work together. The i215LVS is not limited to flown systems; its small footprint makes it the ideal choice where space enables it to be used without being obtrusive.

The i215LVS is comprised of dual 15” (380mm) high power Cool Coil™ low frequency drivers in a front loaded, ported configuration.

The rugged 13-ply Baltic birch enclosure is finished with Community’s robust, smooth Tuf-Coat™ finish. The enclosure also incorporates 23 load-rated M10 rigging points and 4 M8 OmniMount™ 240 inserts in the rear of the enclosure. Simple and flexible installation is achieved using optional hardware from an extensive range designed specifically for the iBOX Series. See the iBOX Hardware Guide for more details.
